Wisconsin Department of Natural Resources Bureau of Watershed Management (WT/3) 101 S. Webster St. Madison, WI 53703 PO Box 7921 Madison, WI 53707-7921 Final Report Form 3400-189 (rev. 7/30/09)

Targeted Runoff Management Grant Program (ch. NR 153) Notice of Discharge Program (ch. NR 153)

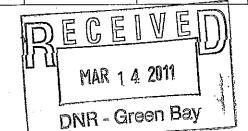

Urban Nonpoint Source & Storm Water Management Grant Program (ch. NR 155)

NOTICE: This Final Report is authorized under ss. 23 165 and 281.66., Wis. Stats.) and chs. NR 153 and NR 155, Wis. Admin. Code. Personally identified information collected will be used for program administration and may be made available to requesters as required under Wisconsin Open Records Law [ss. 19.31-19.39, Wis. Stats.].

Records Law [ss. 19.31-19.39, Wis. Stats.].

INSTRUCTIONS: Your grant agreement requires you to somit a Final Report with your final reimbursement request. This Final Report form must be used in conjunction with the "FINAL REPORT INSTRUCTIONS." The instructions detail how to complete and submit the report to DNR as described in the instructions.

5. Additional information (Space will expand to nit your text;)						
See attached project report prepared by AECOM. Project was expanded from time of grant application to inloude an adjacent street and additional HSD's. Final project payment by the City was January 2011.						
·						
6 Summary of Project Challenges. (Spacewill expand to file)						
The stormwater treatment devices (HSD's) of this project were included with a larger sewer and water reconstruction project. Although better pricing was likely received by packaging the bid, delays occurred due to easement acquisition for water main, sanitary sewer, and storm sewer pipes. This required the project to be broken up into two projects, bid and constructed in two separate years. This also required a grant extension by WDNR for the second project to be constructed. All phases of the project came in within budget. This project also included challenges with "historic fill" and contaminated soil. The city prepared for this prior to the project bid by conducting all necessary soil and groundwater testing, obtaining all necessary disposal permits, and budgeting adequate funds for investigation, on-site consulting assistance during construction, and proper disposal of material. Contingency plans were also in place for any "unknown" substances encountered during the project. The City learned that having a qualified consultant in place for this task was critical to the success of the project. The City of Appleton appreciates the consideration from the WDNR in granting the extension to complete the second part of the project.
